

FAO Fire Management Focus

- Under the guidance of the Forestry Division and the FAO Regional and FAO Country Offices
 - Strengthen Country Fire Management Capacities by a bottom-up approach to enable and support country ownership, leadership and commitment
- Improved Use of Fire Data
 - Data on fire incidence, burned area and damage to support country understanding of their fires
- Support Refinement of Methodology for Estimating Fire Emissions
- Compilation and Review of Materials
 - Look to make available a compilation of relevant, critical and pivotal materials on fire management

FAO Fire Management Partners

- Internally
 - The role of FAO Regions, Forestry Commissions and Country offices is critical and a comparative advantage
 - Interaction within FAO:
 - FAO Forest Resource Assessment,
